Not all notches on Position Lock Bar are used for this model chair. Only the 1st thru 4th notches can be used on the 5291 Recliner.

To ensure proper operation of the reclining mechanism, lubricate all pivot points with a silicone type lubricant (or lubricant approved by your facility) at least twice yearly. Periodically recheck tightness of all screws and bolts.

**Wrinkles in Vinyl** – Storage and shipping can cause wrinkles of the vinyl on your Winco chair. This is normal. Please allow 1-2 weeks at room temperature (approx. 70 degrees) to allow for vinyl to expand back to original appearance.

**Periodically recheck tightness of all screws and bolts, and never use the chair arms, backrest, legrest or tray as a seat.**

**GENERAL CARE & CLEANING:**

- REGULARLY lubricate pivot points on the recline mechanism with a lubricant approved by your facility.

- Periodically inspect tightness of all screws, bolts, and nuts.

Winco furnishings are built to provide durable reliable service when properly cared for. In general all of our products should be 1) Cleaned 2) Rinsed 3) Allowed to air dry.

It is important to note that disinfecting a product is not the same as cleaning the product. Disinfectants alone will not provide adequate cleaning, they do not have grease or oil cutting properties to remove grime or hair and skin oils. Over time, the appearance and feel and performance of your upholstery may diminish if not cleaned properly.

**CLEANING:**

Remove grime, hair and body oils; Your furnishings should be cleaned with mild soap & water solution and a damp cloth on a regular basis (especially where skin & hair make contact with upholstery). Avoid harsh detergents that could damage the upholstery or finish of your recliner. If the furnishing is disinfected with bleach, it MUST be wiped off using only clean water on a damp cloth and then be allowed to air dry. Failure to rinse upholstery with clean water can result in a build-up of residues over time that can dry out the upholstery and cause changes to the look and feel of the upholstery and eventually can lead to cracking.
