

INTRODUCING THE TMM PLUS STRETCHER-CHAIR SERIES: THE PLUS IS IN THE DETAILS

For more than a decade, TMM Stretcher-Chairs have endured the test of time. With safe patient handling in mind, our **One Patient, One Surface**[®] solution has provided caregivers and patients with the benefits of safety, cost-efficiency and overall patient and caregiver satisfaction. As of 2019, TransMotion Stretcher-Chairs are used in 73% of the top 44 acute care hospitals in the U.S.

TransMotion by Winco proudly introduces the TMM4 PLUS and TMM5 PLUS Stretcher-Chairs Series. “We are excited about the work our teams have completed to bring these needed products to the marketplace”, stated Mark Lazzeri TransMotion Marketing Product Manager. Mark continued...”We listened to our customers and incorporated requested enhancements including: Modernized side rails that simplify cleaning and enhance patient security; Dual wheel casters and a center braking system that improve chair maneuverability, require less push force and are easier to operate; an ESD (Electrostatic Discharge) caster which adds safety for both the patient and caregiver; an ergonomically designed pendant that fits comfortably in the caregiver’s hand, is light weight and durable; and a multi-layer foam pad set which helps reduce pressure on patients thereby enhancing patient comfort.”

Our **One Patient, One Surface**[®] concept uses innovative powered positioning to help eliminate patient transfers, limit the risk of injury to patients and staff and increase overall throughput. Additionally, while in the chair position, TMM PLUS Stretcher-Chairs take up 50% less space compared to conventional stretchers.

“I’m pleased with our team’s work to continually enhance all the products we manufacture. The TransMotion by Winco line continues to evolve and improve while filling a unique and under-served market segment,” commented Tom Lorick, President Winco Mfg., LLC.

The NEW TMM4 PLUS and TMM5 PLUS include innovative features that continue to enhance the patient and caregiver experience while addressing issues present in today’s medical facilities. With the rapid growth of Outpatient and Ambulatory Surgery Center (ASC) procedures, TMM PLUS Stretcher-Chairs are a practical choice for these facilities as well as hospitals.
